## Projects

### a)Notes-taking website

A website used for taking notes, CRUD operations are implemented. I have used Bootstrap & Javascript for front-end, PHP for Back-end and MySql as the database in this project.

Website : [www.sahil-crudapp.000webhostapp.com](http://www.sahil-crudapp.000webhostapp.com) .

### b)String manipulation website

A website used for manipulating the string. Made in React.

Website : [www.sahilnaimshaikh.github.io/ReactApp1/](http://www.sahilnaimshaikh.github.io/ReactApp1/)

### c)News fetching website

This website fetches the news from NewsApi, news can be categorized. React is used for Front-end development, this project demonstrates the use of Props and States, how a single component can be used multiple times etc.

### d) e-commerce website

This website depicts an online products buying system. Uses MySql as database and PHP for Back-end.

**Note: Version Controlling System has been used to keep the track of all above mentioned projects.**
